AUDIO CABLES

A full line up of factory terminated speaker cables, custom installation speaker cables (for in-the-wall applications), and RCA and balanced interconnects • Transparent MM2 technology at every budget and performance level

DIGITAL CABLES

The first link in any music or film system • Precision engineered in three performance levels and every termination option • Transparent cable and termination technologies for jitter-free and noise-free digital transmission

HIGH DEFINITION VIDEO CABLES

Fully-compliant HDMI and DVI digital formats, and coaxial and component analog formats, in two performance levels • DVI and HDMI cables transmit high bandwidth, high definition signals even over long distances

POWER CONDITIONING AND SURGE PROTECTION

Manyoutlet options, configurations, and performance levels • Noise-free, unrestricted, and in-phase power signal transmission • Fail-safe, Transparent surge protection

POWER CORDS

Six performance levels of power cords in standard and custom lengths • More current and less AC noise than standard power cords • Transparent PowerLink Cords are a cost effective and significant component upgrade

UPGRADE PROGRAM

Almost limitless future options to improve your system's performance through Transparent upgrades • Includes Transparent audio cables, inwall Brick networks, and power cords • Protects your Transparent investments

The world's finest cables and power conditioning for music and home theater
